# Dragon totem. It's meaning and symbolism in different cultures.

**The Dragon** is a powerful mythical creature whose symbol and totem have a potent energy.

No one knows when legends about dragons first appeared. However, the symbol appears as early as 3000 BC. Dragons are known as omniscient beings with phenomenal magical abilities. They are also trusted protectors and guides.

Dragons also symbolize harmony and balance. They are harbingers of good fortune. They are protective and intelligent. These formidable creatures are not taken lightly when someone tries to exploit the innocent and pure heart.

Dragons are believed to be masters of the four elements. There are Four types of dragons are named after these elements.

**Fire Dragons** have hot, flaming scales, gleaming teeth, and a breath of fire. A symbol of self-control, they are protectors and guardians of secret treasures.

**Water Dragons** are majestic creatures that live in the depths of oceans and rivers. Their smooth scales and graceful swimming movements make them beautiful and strong competitors. Water dragons have a unique ability to control waves to protect their territories.

**Earth Dragons** are said to embody the natural forces of the Earth. They have massive bodies covered in stone scales. They can cross mountains and forests. Earth dragons have the power of earthquake control.

Finally, **Air Dragons** dwell in the heights and can move freely through the sky. They can fly gracefully and swiftly thanks to their light and delicate bodies. Their ability to control the elements of the air is one of the most impressive aspects of Air Dragons.

Most dragons are Eastern (derived from the Chinese word 'lung') or Western (derived from various European folk traditions).

Dragons can be found in many legends throughout the world. Like most mythological creatures, dragons have different meanings in different cultures. In various religions, dragons have often been considered to have significant spiritual powers. As a mythological image, the dragon is a complex symbol, incorporating elements and qualities of various animals.

Some cultures refer to the dragon as the "winged serpent." This image was most widespread in the countries of the East, especially in ancient China. Here, the dragon symbolizes the highest spiritual power, the supernatural, infinity, the spirit of change, the divine power of transformation, the rhythms of nature, the law of creation, and supernatural wisdom. It also embodies the Yang principle, personifying reproduction, fertility, and activity.

In Japan, the dragon is a symbol of the God of Rain. That's why you can see bronze sculptures of these creatures in the temples of this country, with a fountain coming out of their mouths. It is regarded as a protector and guard against misfortune. When the dragon is depicted with curves and twists, it means longevity and prosperity. Drawings of dragons often accompany the construction of temples and roads in Japan to attract good luck and prosperity.

The dragon is one of the most recognizable mythological creatures in European culture as well. Although its meaning and role in different legends and stories may vary, the dragon is often a symbol of power and incredible strength. It symbolizes wisdom and knowledge and is often associated with mountains, caves, and mysterious underground places. In mythology, the dragon is the guardian of treasures and knowledge, which can be gained by overcoming challenges and winning duels.

The dragon is a powerful symbol in Slavic culture. It personifies the power of nature and its elements. It reflects the Slavic belief in natural ability, unpredictability, and majesty. Ideas of the struggle between light and darkness, victory over oneself, order of inner chaos, and spiritual revelation are also associated with the symbolism of the dragon.

In African culture, dragons hold a special place. They have their unique significance. Throughout Africa, dragons are considered mythical creatures with powerful abilities.

The dragon symbolizes strength and protection in North American and Indian mythology. The dragon is often associated with the spirit of the sky or nature spirits in Native American culture. It is considered the guardian and protector of the tribe, able to ward off evil spirits.

Thus, dragons are mentioned in almost all cultures and religions of the world. In most of them, dragons mean power, strength, wisdom, prosperity, and fertility.

The dragon symbol has yet to escape in such a direction as the technical analysis of cryptocurrencies. The "dragon" pattern is one of the most famous analytical tools. The power and strength of the dragon totem are widely spread in the digital space thanks to **The Dragons** project developed by a team of crypto enthusiasts.

# Number «8». A Symbiosis of the Eight and the Dragon Totem.

The number «8» has long been associated with wonder, magic, and the search for harmony and infinity for many people worldwide. It is a number that is identified with justice, stability, and order.

This symmetrical number is an inverted sign of infinity. It can be identified as material and spiritual or male and female.

«8» is the luckiest and most famous number in modern China. This is because it is similar to the word prosperity. The number «8» is also considered a symbol of completeness and balance. It has perfect symmetry and can be divided into halves, quarters, and eighths.

Other cultures, such as Japan, also honor the number eight. In Japan, this number has a special meaning. It plays a vital role in many aspects of life. It is considered a sacred number associated with longevity and good fortune. The number «8» is a symbol of well-being and prosperity.

# The Dragons' basic idea.

Two unique tokens stand out in cryptocurrencies, where innovation and advancement are moving at breakneck speed. More than just crypto tokens, **Green Dragon (GRDR)** and **Golden Dragon (GDDR)** are amulet tokens that bring luck and success.

**Golden Dragon (GDDR)** symbolizes the wisdom and power of the dragon. It signifies favorable changes and personal success for every crypto owner. It is a magnet for attracting good luck into the life.

**Green Dragon (GRDR)** is not just a token. It is your lucky charm in the world of cryptocurrencies. It offers its owners the key to unlocking their crypto portfolio potential. This token is a symbol of self-belief and aspiration for wealth.

**Green Dragon (GRDR)** is your first step into cryptocurrency fortune. You open the doors to create a structure and participate in exciting contests by becoming a **Green Dragon (GRDR)** owner. Attract new partners, grow, and get **Green Dragon (GRDR)**, your pass asset to the world of **Dragons**.

Both tokens combine modern technology and ancient beliefs, bridging the gap between traditional ideas and the future of the digital space. **Green Dragon (GRDR)** and **Golden Dragon (GDDR)** symbolize new possibilities and perspectives.

**The Dragons** is a unique and innovative ecosystem that aims to create an exciting gaming platform that embodies the spirit of ancient dragons. Our goal is to unite the worlds of blockchain and entertainment.

To provide transparency and security, **the Dragons** use advanced blockchain technology. The exciting elements of gaming and social interaction are combined on the platform. Each participant will have a unique experience through unique gameplay mechanics and personalized adventures.

Mechanisms for staking, mining, and using tokens within games create additional opportunities. Social interaction among participants is encouraged in **the Dragons**. Many built-in tools allow users to share experiences and resources. They can even form their own guilds.

*«We are striving to create a product and an exciting journey into a world where everyone can become the hero of their legend.»*

An architecture that provides enhanced security underpins **the Dragons**. Automated and secure transactions within the ecosystem are enabled through smart contract technology on the blockchain.

Consensus algorithms, issuance, and stacking mechanisms that ensure stability and transparency are included in the technical specifications of **Golden Dragon (GDDR)** and **Green Dragon (GRDR)** tokens. **Golden Dragon (GDDR)** and **Green Dragon (GRDR)** tokens are based on the BNB Chain blockchain. The BNB blockchain provides high performance and scalability.

Advanced encryption technologies are used to protect participants' confidential data. Regular code and system audits are performed to identify and eliminate potential vulnerabilities. Optimizing, implementing updates, and adding new features is essential to ensure the system runs smoothly.

**The Dragons'** model creates a sustainable and stimulating environment for participants, ensuring a fair distribution of tokens and encouraging activity.

# **Green Dragon (GRDR) token issuance scheme and stages.**

**Green Dragon (GRDR)** is a token that is issued by the distributing among **Golden Dragon (GDDR)** token holders, provided that there is at least **1 Golden Dragon (GDDR)** token is in staking. **Green Dragon (GRDR)** is issued to the User's account. The number of the **Green Dragon (GRDR)** tokens are received depending on the number of **Golden Dragon (GDDR)** tokens they have in staking. The more tokens are staked, the greater the share of the daily emission among all partners with active staking.

**The Dragons** platform applies a definition of «**staking accumulation**,» which is a group of processes for depositing tokens for staking, freezing tokens during the staking period, storing and accruing tokens, and a node for storing information regarding these processes.

Each User can have one staking accumulation opened to obtain **Green Dragon (GRDR)** tokens. Each staking runs for seven days, upon completion of which the **Golden Dragon (GDDR)** token burning mechanism is triggered, and the remaining **Golden Dragon (GDDR)** tokens are unfrozen on the Account and can be used for new staking.

The first **Green Dragon (GRDR)** issuance under the spray scheme starts as soon as **1000 Golden Dragon (GDDR)** tokens appear on all staking accumulations in the system.

To participate in the daily spraying, a partner must have at least **1 Golden Dragon (GDDR)** token in the staking accumulation.

**Green Dragon (GRDR) issue is 88,000,000 tokens based on the BNB Chain blockchain.**

**TOKEN CONTRACT (WITH 18 DECIMALS):**

**0x34ed9b0c8bde1478470ed3bebd5bd131431d4624**

## **The spraying steps of the Green Dragon (GRDR) tokens are as follows:**

- **1,000-2,000 Golden Dragon (GDDR) tokens on all staking accumulations - 8,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **2,001-4,000 Golden Dragon (GDDR) tokens on all staking accumulations - 7,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **4,001-8,000 Golden Dragon (GDDR) tokens on all staking accumulations - 6,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **8,001-16,000 Golden Dragon (GDDR) tokens on all staking accumulations - 5,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **16,001-32,000 Golden Dragon (GDDR) tokens on all staking accumulations - 4,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **32,001-64,000 Golden Dragon (GDDR) tokens on all staking accumulations - 3,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **64,001-128,000 Golden Dragon (GDDR) tokens on all staking accumulations - 2,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **128,001-256,000 Golden Dragon (GDDR) tokens on all staking accumulations - 1,000 Green Dragon (GRDR) tokens per day are distributed in direct proportion to the number of all Golden Dragon (GDDR) tokens on staking with at least 1 Golden Dragon (GDDR) token per Account.**
- **256,001-512,000 Golden Dragon (GDDR) tokens on all staking accumulations - 2,000 Green Dragon (GRDR) tokens per day are**

distributed in direct proportion to the number of Golden Dragon (GDDR) tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.

- 512,001-1,024,000 **Golden Dragon (GDDR)** tokens on all staking accumulations - 3,000 **Green Dragon (GRDR) tokens** per day are distributed in direct proportion to the number of all **Golden Dragon (GDDR)** tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.
- 1,024,001-2,048,000 **Golden Dragon (GDDR)** tokens on all staking accumulations - 4,000 **Green Dragon (GRDR) tokens** per day are distributed in direct proportion to the number of all **Golden Dragon (GDDR)** tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.
- 2,048,001-4,096,000 **Golden Dragon (GDDR)** tokens on all staking accumulations - 5,000 **Green Dragon (GRDR) tokens** per day are distributed in direct proportion to the number of all **Golden Dragon (GDDR)** tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.
- 4,096,001-8,192,000 **Golden Dragon (GDDR)** tokens on all staking accumulations - 6,000 **Green Dragon (GRDR) tokens** per day are distributed in direct proportion to the number of all **Golden Dragon (GDDR)** tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.
- 8,192,001-16,384,000 **Golden Dragon (GDDR)** tokens on all staking accumulations - 7,000 **Green Dragon (GRDR) tokens** per day are distributed in direct proportion to the number of all **Golden Dragon (GDDR)** tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.
- 16,384,001-32,768,000 **Golden Dragon (GDDR)** tokens on all staking accumulations - 8,000 **Green Dragon (GRDR) tokens** per day are distributed in direct proportion to the number of all **Golden Dragon (GDDR)** tokens on staking with at least **1 Golden Dragon (GDDR)** token per Account.

Further atomization occurs according to a similar scheme - each doubling of the **Golden Dragon (GDDR)** tokens number on all staking accumulations reduce the daily emission by **1,000 Green Dragon (GRDR)** until the amount of **1,000 Green Dragons (GRDR)** per day is reached. After that, doubling of the **Golden Dragon (GDDR)** number on all staking accumulations increase the daily emission by **1000 Green Dragon (GRDR)** until the amount of **8000 Green Dragon (GRDR)** per day is reached. Infinite doubling cycles are built into the program.

# **G**olden Dragon (GDDR) token issuance scheme and stages.

**Golden Dragon (GDDR)** is a token that is issued by the distributing among **Green Dragon (GRDR)** token holders, with the condition that these holders have a structure of personally invited partners with at least **1 Golden Dragon** token on their staking accumulation. The number of indirect invited partners counts up to **8** lines deep into the structure. The minimum number of invited partners is one.

To build the structure, the partner should send the invitee a referral code (it can be found in a personal account after registering and opening staking of any token. It's done once.)

**Golden Dragon (GDDR)** issuance under the affiliate program spraying schema starts as soon as **1000 Golden Dragon (GDDR)** tokens appear on all staking accumulations among the partners.

**Golden Dragon (GDDR)** is issued to the User's account, and to receive **Golden Dragon (GDDR) token** under the spray scheme, the User must:

- Have at least **1 Green Dragon (GRDR)** token on staking.
- Minimum one personally-invited partner with at least **1 Golder Dragon (GDDR)** token on staking.

The user's daily share of **Golden Dragon (GDDR) tokens** is distributed according to the formula:

**The number of invited active partners (with at least 1 Golden Dragon token on their staking accumulation) multiplied by the number of Green Dragon (GRDR) tokens on the staking accumulation.**

Example:

The User has **1 Green Dragon (GRDR)** on staking and has **10** partners, which have **30 Golden Dragon (GDDR)** tokens on staking. The User's daily share is **10** (**1 GRDR** token on staking \* **10** active partners), with the condition that each partner has at least **1 Golder Dragon (GDDR)** token on staking.

The User has **5 Green Dragon (GRDR)** tokens on staking and **10** partners with **50 Golden Dragon (GDDR)** tokens on staking. The User's daily share is

**50 (5 GRDR tokens on staking \* 10 active partners), with the condition that each partner has at least 1 Golden Dragon (GDDR) token on staking.**

Each User can have one staking accumulation opened to get **Golden Dragon (GDDR) tokens**. If a User wants to increase the daily share of **Golden Dragon (GDDR)** by depositing additional **Green Dragon (GRDR) tokens**, he must wait until the end of the open staking accumulation. After the mechanism of **Green Dragon (GRDR)** token burning is triggered, the remaining **Green Dragon (GRDR)** tokens are unfrozen. Then, the User can start the staking again by entering the preferred number of **Green Dragon (GRDR) tokens**.

**Golden Dragon (GDDR)- 88,000,000 tokens issued on the BNB Chain blockchain.**

**TOKEN CONTRACT (WITH 18 DECIMALS):**

**0x174251287a4a10a44f57aed92fc12af8882f115c**

**Spraying steps of the Golden Dragon (GDDR) by the affiliate program are as follows:**

- **1,000-2,000 Golden Dragon (GDDR)** on all staking accumulations - **8,000 Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.
- **2,001-4,000 Golden Dragon (GDDR)** on all staking accumulations - **7,000 Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.
- **4,001-8,000 Golden Dragon (GDDR)** on all staking accumulations - **6,000 Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.
- **8,001-16,000 Golden Dragon (GDDR)** on all staking accumulations -

5,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 16,001-32,000 **Golden Dragon (GDDR)** on all staking accumulations - 4,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 32,001-64,000 **Golden Dragon (GDDR)** on all staking accumulations - 3,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 64,001-128,000 **Golden Dragon (GDDR)** on all staking accumulations - 2,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 128,001-256,000 **Golden Dragon (GDDR)** on all staking accumulations - 1,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 256,001-512,000 **Golden Dragon (GDDR)** on all staking accumulations - 2,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 512,001-1,024,000 **Golden Dragon (GDDR)** on all staking accumulations - 3,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 1,024,001-2,048,000 **Golden Dragon (GDDR)** on all staking accumulations - 4,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1

**Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 2,048,001- 4,096,000 **Golden Dragon (GDDR)** on all staking accumulations - 5,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 4,096,001- 8,192,000 **Golden Dragon (GDDR)** on all staking accumulations - 6,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 8,192,001-16,384,000 **Golden Dragon (GDDR)** on all staking accumulations - 7,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

- 16,384,001-32,768,000 **Golden Dragon (GDDR)** on all staking accumulations - 8,000 **Golden Dragon (GDDR)** per day in direct proportion to the number of registered partners of eight structure lines with at least 1 **Golden Dragon (GDDR)** on the staking. **Golden Dragon (GDDR)** is distributed to those staking accumulations with at least 1 **Green Dragon (GRDR)** on the staking.

Further atomization occurs according to a similar scheme — each doubling of **Golden Dragon (GDDR)** on all staking accumulations decreases the daily emission of the affiliate program by **1000 Golden Dragon (GDDR)** until the amount of **1000 Golden Dragon (GDDR)** per day is reached. After that, the doubling of **Golden Dragon (GDDR)** on all staking accumulations increase the daily emission of the affiliate program by **1000 Golden Dragon (GDDR)** until the amount of **8000 Golden Dragon (GDDR)** is reached. Infinite doubling cycles are built into the program.

# **G**olden Dragon (GDDR) and Green Dragon (GRDR) token burning mechanisms.

Users who participated in the **Golden Dragon (GDDR)** and **Green Dragon (GRDR)** spray distributions have tokens burned in their staking accounts at the end of each period (7 days).

- If a partner has been receiving **Green Dragon (GRDR)** by spraying for seven days, then after the expiration of this period, the program calculates the amount of received **Green Dragon (GRDR)**, then **Golden Dragon (GDDR)** tokens in the amount half of the amount of accrued **Green Dragon (GRDR)** are written off and burned from their staking accumulation. If the volume of all **Golden Dragon (GDDR)** tokens on the staking accumulation is less than half of the volume of accrued **Green Dragon (GRDR)**, then all **Golden Dragon (GDDR)** tokens on the staking accumulation is discarded and burned.
- If the partner has been receiving **Golden Dragon (GDDR)** by spraying for seven days, then after the expiration of this period, the program calculates the volume of received **Golden Dragon (GDDR)**, then **Green Dragon (GRDR)** tokens in the volume half of the volume of accrued **Golden Dragon (GDDR)** is written off and burned from the staking accumulation. If the amount of all **Green Dragon (GRDR)** tokens on the staking accumulation is less than half of the amount of accrued **Golden Dragon (GDDR)** tokens, then all **Green Dragon (GRDR)** tokens on the staking accumulation is written off and burned.

# **Issuing Green Dragon (GRDG) and Golden Dragon (GDDR) tokens to keep the project running and developing itself.**

Cost items for additional issues:

- Marketing, advertising, listing on cryptocurrency exchanges — 888 **Golden Dragon (GDDR)** and 888 **Green Dragon (GRDR)** per day.
- Maintaining token liquidity on cryptocurrency exchanges — 888 **Golden Dragon (GDDR)** and 888 **Green Dragon (GRDR)** per day.
- Development of new digital products based on **Golden Dragon (GDDR)** and **Green Dragon (GRDR)** — 888 **Golden Dragon (GDDR)** and 888 **Green Dragon (GRDR)** per day.
- Staff salaries, server maintenance, and related costs to maintain functionality — 888 **Golden Dragon (GDDR)** and 888 **Green Dragon (GRDR)** per day.

Issuance of tokens for the provision and development of **The Dragons** project starts from the first day of registration of wallets with the respective purpose.

The issuance will be terminated upon reaching 88,000,000 **Golden Dragon (GDDR)** and 88,000,000 **Green Dragon (GRDR)**.

# **S**tructural competition mechanics.

## **Dragon Master.**

**The Dragons** project has unique competition and game mechanics, which include various rewards and incentives.

Users who actively participate in the project's development by inviting new **Green Dragon (GRDR)** and **Golden Dragon (GDDR)** holders can participate in team competitions. The most active teams receive high rewards.

The team game rules with prizes in **Green Dragon (GRDR)** or **Golden Dragon (GDDR)**:

- Participants are organized into teams of no more than **50** people over a three-week period.
- Each participant deposits **1 Green Dragon (GRDR)** or **Golden Dragon (GDDR)** into the prize pool. Information on what tokens are contributed to the prize pool will be posted on the platform and updated for each competition.
- Then the competition begins. It lasts seven days, during which you can neither join nor leave the team.
- The essence of each participant's work is to invite as many affiliates as possible to their first line within seven days, who will become **Golden Dragon (GDDR)** holders on staking (i.e., participants of the general issue of **Green Dragon (GRDR)**).
- At the end of the game, there will be five winning teams whose members invited the most significant number of affiliates to the first line of their structure. Five prizes will be distributed among them. Each reward will be divided equally among all members of the team.

- The distribution of the prize fund will be in the following proportions:

- 1) 1st place - 1/2 of the prize fund.
- 2) 2nd place - 1/4 of the prize fund.
- 3) 3rd place - 1/8 of the prize fund.
- 4) 4th place - 3/32 of the prize fund.
- 5) 5th place - 1/32 of the prize fund.

In addition to the team structure competition, users have the opportunity to try their luck at achieving **the Dragon Master** status.

The rule for obtaining **the Dragon Master** status:

- A participant's structure must have at least **1,000** partners in eight lines with open **Golden Dragon (GDDR) token** staking for a total of at least **10,000** tokens.

After the program captures the fulfillment of these conditions, the participant is assigned **the Dragon Master** status.

- **The Dragon Master** status provides the user with unique privileges including the ability to change their avatar on **The Dragons** platform to a more robust and impressive dragon.

- In recognition of their achievements, the participant is rewarded with an exclusive **Gold Coin** with a **Dragon** image and a gemstone, which is sent to them by a delivery service to the address they specify.

In addition to the above, **The Dragons** platform will be constantly adding various contests, games, and competitions, participation in which will give the opportunity to receive rewards and privileges.

# P roject Scaling. Development Plans.

**The Dragons** platform provides participants with unique tools to mine tokens. In the future, the service will continue to expand and scale. This will create new opportunities for participants in the cryptocurrency industry and the digital space.

Work is underway in several directions, including creating a meta-universe where gamification reaches an entirely different level. Using an innovative approach is going to attract significant interest. The digital space will be filled with a virtual world of exciting games, strategies, elements of social interaction, and many other forms of entertainment. And every participant will be able to find an exciting niche for themselves. Whether it is games, gaining new knowledge, or opportunities to realize innovative ideas.

The virtual world of **The Dragons** awaits you. It's a place to immerse yourself in exciting adventures and unlock unlimited possibilities.

As early as 2024, enthusiasts of different games and competitions can test several game mechanics provided on **The Dragons** platform.

Developments are also underway to issue NFT tokens with unique characteristics. The powerful symbolism of dragons will be displayed on unique NFT tokens, which will open additional opportunities for their holders. The platform's development plans include constantly expanding functionality and innovative approaches to integrating digital tools. This approach plays a vital role in the development of the marketplace, the benefits of which users will be able to appreciate in 2024-2025.

**The Dragons** platform is developing both in and outside the virtual space. Since the **Golden** and **Green Dragons** totems have extraordinary power and powerful influence on their amulets' owners, it was decided to install statues of majestic **Dragons** in every capital city. In 2024, some capital cities will become owners of similar charms, symbolizing the state's prosperity.

**The Dragons Project** is the place where legends are born.

Our team of crypto enthusiasts does not stand still. We improve our unique platform daily by learning and introducing new technologies. Our goal is to create an exceptional digital product. One that maximizes our partners'

satisfaction. And we are ready to take every one of you on this exciting journey!
